

## **Speak Selection (new to iPad2)**

This feature will read text in websites, emails, word documents, etc.

This feature works whether VoiceOver is turned on or not.

This feature works in coordination with Zoom (magnification).

### **Home Page**

Open (one tap) Settings icon (looks like a gear)

It takes you to General. Select (tap) Accessibility (in bottom frame)

Next screen, in top frame, find Speak Selection, and tap it.

Next screen, at top, tap the OFF button. It should change to ON.

Below that, slide the bar for Speaking Rate. The turtle is slower, the rabbit is faster.

When in a text file, press and hold on desired text.

A pop up menu will appear. Tap on desired action. (Copy, select, select all, or define, speak).

- a. Select or select all is used to highlight text.
- b. Copy is used to copy text; choose paste in next menu bar.
- c. Define will bring up a dictionary entry for that highlighted word.

A blue field with 2 blue buttons will appear over the text.

Drag a blue button to highlight text desired.

Once text is highlighted, the pop up menu appears again, which may contain new menu items.

Tap button for desired function.
